Soft Skills: Problem Solving, Analytical Thinking, Teamwork, Communication

Projects

Stock Newsletter Platform | React.js, Node.js, Auth0, Chart.js, MongoDB

Capstone Project, 2024

- Built client and admin dashboards for a stock newsletter platform as part of the Humber College capstone project, delivering a full-stack **MERN** application.
- Implemented secure user authentication using **Auth0**, managing role-based access control for subscribers and administrators.
- Developed dynamic data visualizations with **Chart.js** to present stock insights and market trends in an interactive, user-friendly format.
- Integrated **RESTful APIs** for real-time stock data fetching, enabling up-to-date newsletter content delivery to subscribers.

Experience

Software Engineer Intern

Arth Infosoft Pvt. Ltd.

January 2022 – April 2022

Ahmedabad, Gujarat, India

- Developed a web-based Appraisal Tracking System to digitize and streamline employee performance management processes.
- Built core HR modules covering employee registration, attendance tracking, leave management, payroll processing, and department management.
- Created an admin dashboard to display employee records, department details, and performance data in a structured and user-friendly layout.
- Designed the database schema and managed data using models and migrations to ensure organised and scalable data handling.
- Followed the complete software development lifecycle including requirement analysis, database design, coding, and manual testing.
