PROFESSIONAL SUMMARY

Detail-oriented Data Analyst currently with Atopic Laboratories Pvt. Ltd., experienced in data cleaning, exploratory data analysis (EDA), statistical modeling, and data visualization. Graduate of Humber College (Toronto) with a Postgraduate Certificate in Information Technology Solutions and Dean's Honour Roll recognition across 4 consecutive terms. Proficient in Python, SQL, and BI tools with a proven ability to translate complex datasets into actionable business insights.

TECHNICAL SKILLS

Languages and Analysis: Python (Pandas, NumPy, Matplotlib, Seaborn), SQL, R
Visualization and BI: Power BI, Tableau, Matplotlib, Seaborn, Excel
Databases: MySQL, MongoDB, PostgreSQL, MariaDB
Tools and Platforms: Jupyter Notebook, Git, GitHub, AWS (Cloud Practitioner Certified)

WORK EXPERIENCE

Data Analyst

Atopic Laboratories Pvt. Ltd., Ahmedabad, Gujarat, India

February 2026 - Present

- Analyze sales, field, and product performance data at a pharmaceutical marketing company spanning dermatology, pediatrics, gynecology, orthopedics, dental, and ENT categories, using Excel and SQL to build reports and dashboards tracking performance by product, territory, and division.
- Analyze prescriber and market data to identify growth opportunities and underperforming areas across product divisions; prepare periodic MIS reports summarizing sales trends versus targets and achievements.
- Support the marketing team with data-backed insights for product launches, promotional campaigns, and territory planning while maintaining well-organized data across multiple product lines.

Software Engineer Intern

Arth Infosoft Pvt. Ltd., Ahmedabad, Gujarat, India

January 2022 - April 2022

- Developed a web-based Appraisal Tracking System using Python and Django, implementing core modules including employee registration, attendance tracking, leave management, payroll processing, and department management.
- Built an admin dashboard displaying employee records, department details, and performance-related data, with the database schema designed and managed in PostgreSQL using Django models and migrations.
- Followed the complete software development lifecycle - requirement analysis, database design, coding, and manual testing - to ensure reliable application performance.

PROJECTS

Employee Performance and HR Analytics Dashboard

Python, Pandas, Matplotlib, Seaborn, SQL, Excel

- Built an end-to-end HR analytics pipeline to analyze attendance, leave utilization, and performance trends across departments, cleaning and transforming raw records using Pandas to resolve duplicates, null values, and inconsistencies.
- Developed dynamic dashboards using Matplotlib and Seaborn for HR managers to monitor KPIs and payroll anomalies at a glance.
- Automated data aggregation tasks with Python scripts, reducing manual effort and improving monthly reporting turnaround time.

Stock Newsletter Platform

Capstone Project, Postgraduate Program, Humber College

- Designed and developed a Stock Newsletter Platform that transforms raw stock market data into clear, dynamic visual insights for end users.
- Used Chart.js to build interactive data visualizations that make complex stock trends easy to interpret at a glance.
- Delivered the project as the culminating capstone for the Information Technology Solutions program, applying end-to-end skills in data handling and visualization.

EDUCATION

Postgraduate Certificate, Information Technology Solutions

Humber College, Toronto, Ontario, Canada

January 2023 - August 2024

Dean's Honour Roll: Winter 2023, Summer 2023, Winter 2024, Summer 2024 (4 consecutive terms)

Bachelor of Engineering, Information Technology

Gujarat Technological University, Ahmedabad, Gujarat, India

2018 - 2022

CERTIFICATIONS

- AWS Certified Cloud Practitioner - Amazon Web Services
- Database Operations in MariaDB Using Python - Certification of Completion
